

SELECTED BIBLIOGRAPHY

Overview

Since the excited-state tautomerization reactions of 7-azaindole and 1-azacarbazole are good representatives of intermolecular proton transfer, various aspects of these molecules have been extensively studied. The following bibliography is an effort to acknowledge the substantial body of published studies that consider topics that may be of additional interest to readers. The collection is arranged in alphabetical order based on the surname of the first author.

1-Azacarbazole

VITA

LEWIS REYNOLDS

Lewis Reynolds earned the Bachelor of Science degree with majors in chemistry and physics from Calvin College in Grand Rapids, Michigan (May 1993). He gratefully acknowledges the support of the Calvin College Presidential Scholarship (1989-1993), DOW Chemical Foundation Scholarship (1989-1993), Van Oosten Scholarship in Physics (1991-1992), and Barry M. Goldwater Science Scholarship (1991-1993).

Lewis continued graduate study in physical chemistry at The Pennsylvania State University from June 1993 to May 1998. During this time he worked as a Graduate Fellow, Research Assistant, and Teaching Assistant. Lewis was awarded the *Accounts of Chemical Research* Graduate Prize in 1994. He gratefully acknowledges the support of the Braddock Achievement Grant (1993-1996), Lubrizol Foundation Award (1997), and educational assistance from Administaff (2002).

Following the completion of the first version of his dissertation in May 1998, Lewis served as Instructor of Physics at Calvin College (1998-1999). He is presently employed as a Research Engineer at Data Fusion Corporation in Northglenn, Colorado (2000-) where he is responsible for the research and development of algorithms for material detection in hyperspectral images and for predicting the performance of automatic target recognition (ATR) algorithms.

Lewis Reynolds is coauthor of 6 journal or conference papers, coauthor of the *DFC HYPERTOOLS User's Guide* (Northglenn, Colorado: Data Fusion Corporation, 2002), and author of the *DFC HYPERTOOLS Technical Guide* (Northglenn, Colorado: Data Fusion Corporation, 2002). He is a member of the Society of Photo-Optical Instrumentation Engineers (SPIE).
